B. Pharmacy (First Semester) Examination, April-May 2019

(Old Scheme)

(Pharmacy Branch)

PHARMACEUTICAL CHEMISTRY-I

(Physical) (Old)

Time Allowed : Three hours

Maximum Marks : 70

Note : *Attempt any **five** questions. Each question carries equal marks.*

1. Write the postulates of kinetic theory of gases and derive the kinetic gas equation. 14

2. Define the order of reaction and derive first order of reaction along with its half life. 14

3. What is meant by phase component, degree of freedom? Derive the phase role for one component system. 14

4. Define colligative properties and explain the lowering of vapour pressure. 14

5. Define surface tension or viscosity and explain any one method of determination. 14

6. Write the postulates of quantum mechanism and derive the Schrodinger wave equation. 14

7. Write short notes on any **two** : 2×7

(a) Refractive index

(b) Lambert-Beer's Law

(c) Debye-Hackel theory
