(Old Scheme)

(Elect. Engg. Branch)

INSTALLATION MAINTENANCE & TESTING of ELECTRICAL EQUIPMENTS

Time Allowed : Three hours

Maximum Marks : 80

CSVTUonline.com

Minimum Pass Marks : 28

Note : Part (a) from each question carries 2 marks. Attempt any two parts from (b), (c) and (d) is compulsory.

1. (a) What do you mean by electrical shock. 2

(b) Describe the organisation charge for commissioning

phase, operation, maintenance phase and construction phase of project. 7

CSVTUonline.com

(c) What do you mean by safety management? Write down various principles of safety management. 7

(d) What are the recommended safety precaution while working on high voltage and low voltage installation of Electrical plant? 7

CSVTUonline.com

2. (a) What are the various types of transformer used in the industries? 2

(b) State the important step in maintenance of power transformer in respect of daily check, monthly check and annual check. 7

(c) What is the typical maintenance schedule for 1000 kVA transformer 7

(d) Explain transformer oil filteration with neat diagram. 7

3. (a) What are the switchgears in a substation? 2

(b) Write down various types of commissioning of test of out door circuit breaker. 7

(c) What are the various types of circuit breakers. Explain vacuume circuit breaker in detail. 7

CSVTUonline.com

(d) What are the differnt step during trouble shooting of electrical equipment in substation? 7

4. (a) What is the need for standards of degree of protection, cooling systems for electrical equipment? 2

(b) State the various categories of tests on three phase induction motor. 7

CSVTUonline.com

(c) Write the procedure for drying-out of electrical rotating machine. 7

(d) Write down the typical maintenance schedule for synchronous motors. 7

5. (a) What is hot-line maintenance? 2

(b) What are the special tools for hot line maintenance? 7

(c) State and explain the principle of live working. 7

(d) What are the various safety procedures while hot line maintenance is going on? 7
