B. E. (Fifth Semester) Examination, April-May 2015

(New Scheme)

(Mech. Engg.)

MANUFACTURING SCIENCE-II

Time Allowed : Three hours

Maximum Marks : 80

Minimum Pass Marks : 28

Note : Solve all questions. Part (a) of each question is compulsory. Attempt any two questions from (b), (c) and (d) from each question.

(a) What is meant by Grindability? 2

(b) Describe the different methods and applications of Centreless grinding. 7

(c) Name the different bond materials used for making grinding wheels. State their characteristics and applications. 7

(d) What is Lapping? With the help of neat diagram, explain the principle of vertical spindle lapping machine. 7

2. (a) Name the important parameters that are considered in selecting a particular non-conventional machining method. 2

(b) Discuss in short the applications, advantages and limitations of an EDM process. 7

(c) Explain the principle of ECM with a neat sketch. Also explain the various process parameters of ECM process. 7

(d) What is AJM process? Explain why its not suitable for soft materials. 7

3. (a) What is the difference between impression die forging and flashless forging? 2

(b) Discuss Forging Presses. Why are they considered better in performance than drop hammers? 7

www.csvtuonline.com

www.csvtuonline.com

(c) Write a short note on Upset Forging. 7

(d) Explain in short different types of hot extrusion processes. Name also the various extrusion defects. 7

LIBRARY
ACC No.

4. (a) Can the application of external tension affect flat rolling process? How? 2

(b) Differentiate between tandem rolling mills and cluster mills. 7

(c) With the help of a neat diagram, explain the rolling parameters and their effect on the process. 7

(d) Explain the process of wire drawing with the help of a neat diagram. 7

5. (a) How does embossing differ from coining? 2

(b) What do you understand by clearance between punch and die in shearing operation? State the factors which affect clearance between punch and die. 7

(c) What is Bending? Explain the various methods of Bending. 7
