MBA (3rd Semester)

Examination, Nov.-Dec., 2014

Branch : Management

PRODUCTION PLANNING AND CONTROL (NEW)

Time Allowed : Three Hours

Maximum Marks : 80

Minimum Pass Marks : 32

Note : (i) All questions carry equal marks.

(ii) There is internal choice in each unit.

(iii) Be precise and to the point.

(iv) Make suitable assumptions whereever necessary.

Unit-I

Q. 1. What do you mean by 'production planning' ? Discuss the importance and characteristics of strategic planning, tactical planning and operational planning in the context of production management. 16

OR

Q. 2. (a) Exlplain the scheduling rules with their relative advantages and disadvantages. 10

(b) Discuss in detail the following function of routing : 6

(i) Methods Analysis

(ii) Work Standards

Unit-II

Q. 3. (a) Place Aggregate planning in context with the term planning horizon.

(b) What is the appropriate planning horizon for aggregate planning ?

(c) Explain the procedure involved in aggregate plan with suitable example. **16**

OR

Q. 4. A company manufactures three products P, Q and R using the same manufacturing facilities arranged in six departments A, B, C, D, E and F. The material handling is done by a forklift. The containers can carry 300, 400 and 600 pieces of

products P, Q and R respectively. The annual demand for each product is 12000 units. Sequence of operation of product movement are given below. **16**

Product	**Movement**
P	A → E → B → D → C → F
Q	A → B → C → D → E → F
R	C → B → A → E → D → F

Construct the travel chart.

Unit-III

Q. 5. (a) As a manager what factors will you consider while determining capacity requirements of a mobile phone manufacturing unit ? **10**

(b) What constraints does the manager face while designing 'Effective Capacity' ? 6

OR

Q. 6. The monster company manufactures three products – X, Y and Z. The variable expenses and sales prices of all the products are given below. 16

	Product X	Product Y	Product Z
Sales price/unit	₹ 200	₹ 100	₹ 50
Variable cost/unit	₹ 100	₹ 75	₹ 25

The total fixed expenses of the company are ₹ 50,000 per month. For the coming month company expects the sale of three products in the following ratio :

Product X : 20%

Product Y : 30%

Product Z : 50%

Compute the break-even point of monster company in units and rupees for the coming month.

Unit-IV

Q. 7. Write short notes on : **16**

(a) Lumply demand

(b) Lead time

(c) Time phasing

(d) Dependent demand

OR

Q. 8. What is 'Material Requirement Planning'? Discuss the scope and need of 'Material requirement planning' within a manufacturing organization. **16**

Unit-V

Q. 9. ABC company is planning to stock new product. The company has gathered the following information : **16**

Annual uses = 54000 unit

Cost of product = 365/unit [in ₹]

Ordering cost = 55/order [in ₹]

Carrying cost = 28% / year of inventory value held.

Determine :

(a) Optimal number of units per order.

(b) Optimal number of orders/year.

OR

Q. 10. Discuss the following demand for casting techniques in detail : **16**

(a) Exponential smoothing technique

(b) Delphi method
